

HR Voltage Indicator: CVI E

The Voltage Indicator is designed for to use with MV capacitive voltage divider devices to indicate system power status.

Features:

- System monitoring with safety (HR System)
- No auxiliary power is needed for voltage detection
- Bright and long-life LED to indicate
- Easy for installation and maintenance
- 4 connection leads for measuring at front panel
- Economical alternative

**Technical Parameters:**

- 1.Operating voltage : 2kV-40kV with capacitive voltage divider
- 2.Rated frequency : 50Hz or 60Hz
- 3.Ambient temperature range : -25°C to +55°C
- 4.Protection class : IP20
- 5.Dimension : 36 x 62 x 45mm
- 6.Weight : 0,05kg
